Hi Kate,

Thanks first of all for turning this around so quickly. I've run through the reviews and I think they're fairly self-explanatory, and generally should be relatively easy to address. A call with the reviewers might be useful, but I'm not sure it's necessary.

What I would like to get more clarification on is what your needs might be with respect to revisions. Could we talk about this briefly either on Wednesday or Thursday? Dave will be at a symposium, but will have breaks around lunchtime both of those days (12AST/2MST/4EST). Any chance we could set up a call for one of those slots?

Thanks,

Cam

Subject: letter reviews of Wobus et al. 2012 report

Hi Cam, Ann, and David,

As we discussed, EPA had a contractor conduct a peer letter review of the Wobus et al. 2012 report, Potential Hydrologic and Water Quality Alteration from Large-scale Mining of the Pebble Deposit in Bristol Bay, Alaska. Those reviews have been completed, and attached is the final report from the contractor. Four reviewers were chosen by the contractor, and they reviewed the document according to charge questions provided by EPA.

We are trying to arrange a time for you to speak with the reviewers. The reviewers will not be revisiting their reviews after this call, but it will give you the opportunity to get clarification on any of their comments. Would you like to participate in this call, and if so what does your availability look like this week and next?

Please feel free to call or email if you have any questions, and thank you again for your help in getting the documents and supporting materials ready for review.

Best,  
Kate
